in all specializations

AL DIWAN UNITED
ENGINEERING, TRADING & INVESTMENT

General Contracting

- Engineering consultancy
- Engineering design
- Construction and finishing
- Building and covering
- Restoration and maintenance
- General contracting
- Contract management
- Facility and system development and rehabilitation
- Operation, maintenance, and services

Electrical, Mechanical, and Industrial Automation

- Power transmission and distribution systems and their protections
- High-availability power supply systems
- Low-current systems and lighting
- Surveillance and security systems
- Ventilation, air conditioning, and cooling towers
- Building management systems
- Command and control centers
- Precision equipment
- Tank monitoring systems
- Sewage water pumping and treatment systems

Major Solar Energy Projects

- Installation of many solar-powered irrigation projects
- Solar power systems for schools and factories
- Hundreds of residential solar systems
- Biogas production plants from animal waste
- Certified by the Energy Research Center (Renewable Energy Support Fund)
- ON GRID station certified by the research center

Information Technology

- Communication networks and data exchange
- Databases
- Business applications and systems
- Custom-built software
- Paid information services

Renewable Energy

- Grid-connected, off-grid, and hybrid solar power systems
- Solar-powered water pumping systems
- Wind farms
- Biogas stations
- Environmental monitoring centers
- Energy storage systems

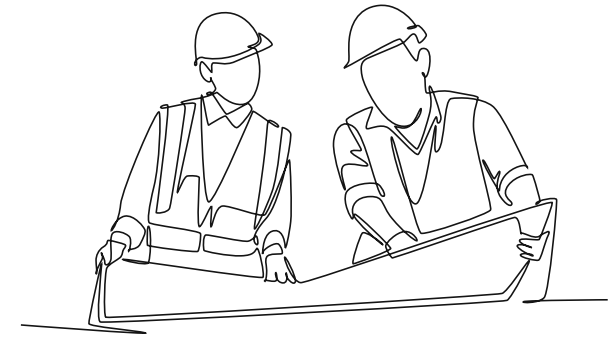

Contracts for Institutions, Companies, and Embassies

1. Maintenance services
2. Surveillance, camera, and security systems
3. Communication and telephone system maintenance
4. Central and independent air conditioning systems
5. Electrical and mechanical works
6. Construction, decoration, and remodeling works

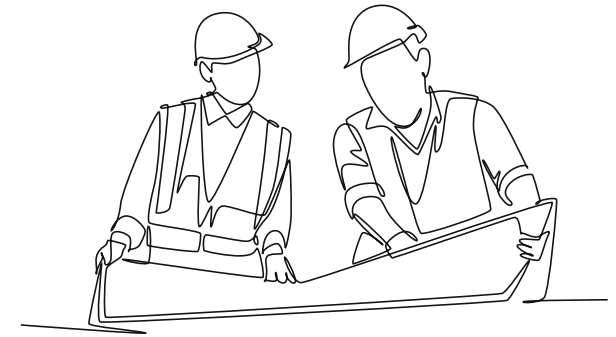

List of Major project

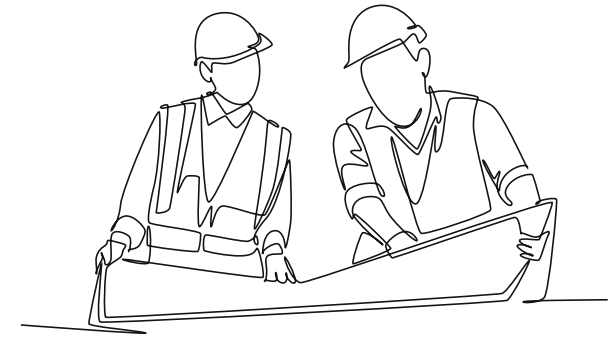

#	Client	Project	Location
1	UNDOF	Electrical works	Quneitra
2	United Nations	Electrical works in Vocational Institute	Damascus
3	Saudi Arabian Embassy	Logistics services	Damascus
4	European Union	Lighting and sound works for Salah al-Din shrine	Rural Damascus
5	Chinese Embassy	Solar-powered street lighting for Sarghaya town	Rural Damascus
6	UNRWA	Maintenance in educational facilities	Homs
7	European Commission	Electrical works for Prince Abdelkader Palace	Damascus
8	Al-Wadi University	Electrical and lighting works	Homs

List of Major project

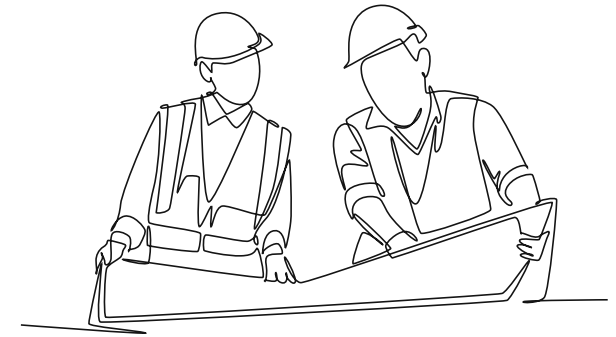

#	Project Owner	City	Scope of Work
9	Al-Omayyad Square	Damascus	Supplying equipment and implementing lighting works for the square and water pumping systems
10	Gas Station (West of Tishreen)	Al-Hasakah	Electrical works
11	Deir Ezzor Oil Company	Deir Ezzor	Electrical works for fire alarm and firefighting systems at Al-Omar Field
12	Majesty Inn Hotel	Bloudan	Installation of internal and external surveillance cameras
13	Ministry of Interior – Civil Affairs	Damascus	Electrical works
14	Bin Laden International Company	Damascus	Electrical works for Palm Village project
15	Damascus International Airport	Damascus	Lighting works
16	Al-Fares Pharmaceutical Industries	Saidnaya	Full electrical implementation for the factory

List of Major project

#	Project Owner	City	Scope of Work
17	Solarik Company	Damascus	solar system- 25 kW on grid
18	Deir Ezzor Oil Company	Deir Ezzor	Electrical works for company-owned restaurants
19	Ministry of Finance	Damascus	Supply and electrical installation for IT hall
20	Al- Jarjaniyah Hospital	Zabadani	Supply and electrical works for hospital
21	Civil Affairs Directorate	Tartous	Electrical works for the directorate's building
22	Conference Palace	Damascus	Electrical works for the directorate's building
23	Conference Palace	Damascus	Electrical works on the road to the Conference Palace
24	National Energy Research Center	Damascus	On Grid-connected photovoltaic system installed on transformer centers' roof

List of Major project

#	Project Owner	City	Scope of Work
25	Damascus Governorate	Damascus	Photovoltaic systems for 20 traffic light junctions
26	Ministry of Local Administration	Damascus	A 26-kw on Grid photovoltaic system on the roof of the General Secretariat
27	Ministry of Agriculture	Damascus	200 kW photovoltaic system: - 25 kW solar pumps at ACSAD center – Al-Sabboura - 150 kW on artificial insemination lab in Ghazlaniyah - 25 kW on General Directorate of Veterinary Medicine – Bab Sharqi
28	Ministry of Electricity	Damascus	68 kW photovoltaic system – on the roof of the General Secretariat
29	Latakia Water Directorate	Latakia	Agricultural solar water pumps for 9 areas in rural Latakia and Jableh
30	Most governorates – Civil Registries	Multiple	Electrical works

Al-Omayyad Square Lighting Project

AL Diwan United Company was responsible for the underwater lighting system implementation at Al-Omayyad Square, the largest square in Damascus, located in front of the Radio and Television building and serving as a central transportation hub in west Damascus.

The square features a symbolic Damascus Sword Monument, representing the city's strength and resilience.

- The lighting project was executed under the supervision of electrical and energy engineers.
- State-of-the-art equipment and RGB color-changing technology were used.
- Lighting synchronized with water pump movement was installed according to international standards.

Al-Wadi Private University

AL Diwan United Company was selected to execute all internal and external lighting works for the university.

- The work was supervised by specialized engineers and technicians.
- Advanced technology was used, imported by the company to meet international standards

Water Pumping Project

Al-Muzayri'ah Station Using Solar Energy

- This project uses solar energy to solve water supply and irrigation challenges in rural and agricultural areas.
- AL Diwan United Company for Solar and Alternative Energy was responsible for executing the project.
- 360 solar panels were installed to operate the pumping system.
- A 110 kW inverter ensures continuous energy supply.
- The system includes a 55 kW submersible pump and an 80 kW horizontal pump.
- The project was implemented on behalf of the Latakia Water Directorate, providing water for multiple villages.

BIOGAS Digester Project

The first of its kind in Syria and neighboring countries.
And generate the energy needed for the facility

- The system generates biogas from cow manure.
- Installed at the Homs Cattle Farm.
- Produces sufficient gas to operate a generator that powers the facility.
- Surplus gas is used for domestic cooking purposes.

Interior Works

Bloudan Five-Star Hotel (20 Floors)

The Bloudan Five-Star Hotel is one of the largest hotels in the area, which is a prime tourist destination, especially for visitors from Arab countries drawn by its natural beauty and long snowy seasons.

AL Diwan United Company carried out:

- Full interior finishing works.
- Complete electrical, mechanical, HVAC, safety, and lighting installations.
- Implementation of advanced global technologies under the supervision of experts.
- Designed the hotel with color-changing lighting systems adaptable to seasons and occasions.

Marota City

The first of its kind in Syria and neighboring countries.
And generate the energy needed for the facility

This new city:

- Adheres to green architecture principles.
- Features architecturally diverse and visually stunning blocks.
- Is connected to major international highways (Lebanon, Jordan, provinces, airport road).
- Is located near Damascus University, key government facilities, and upscale neighborhoods.

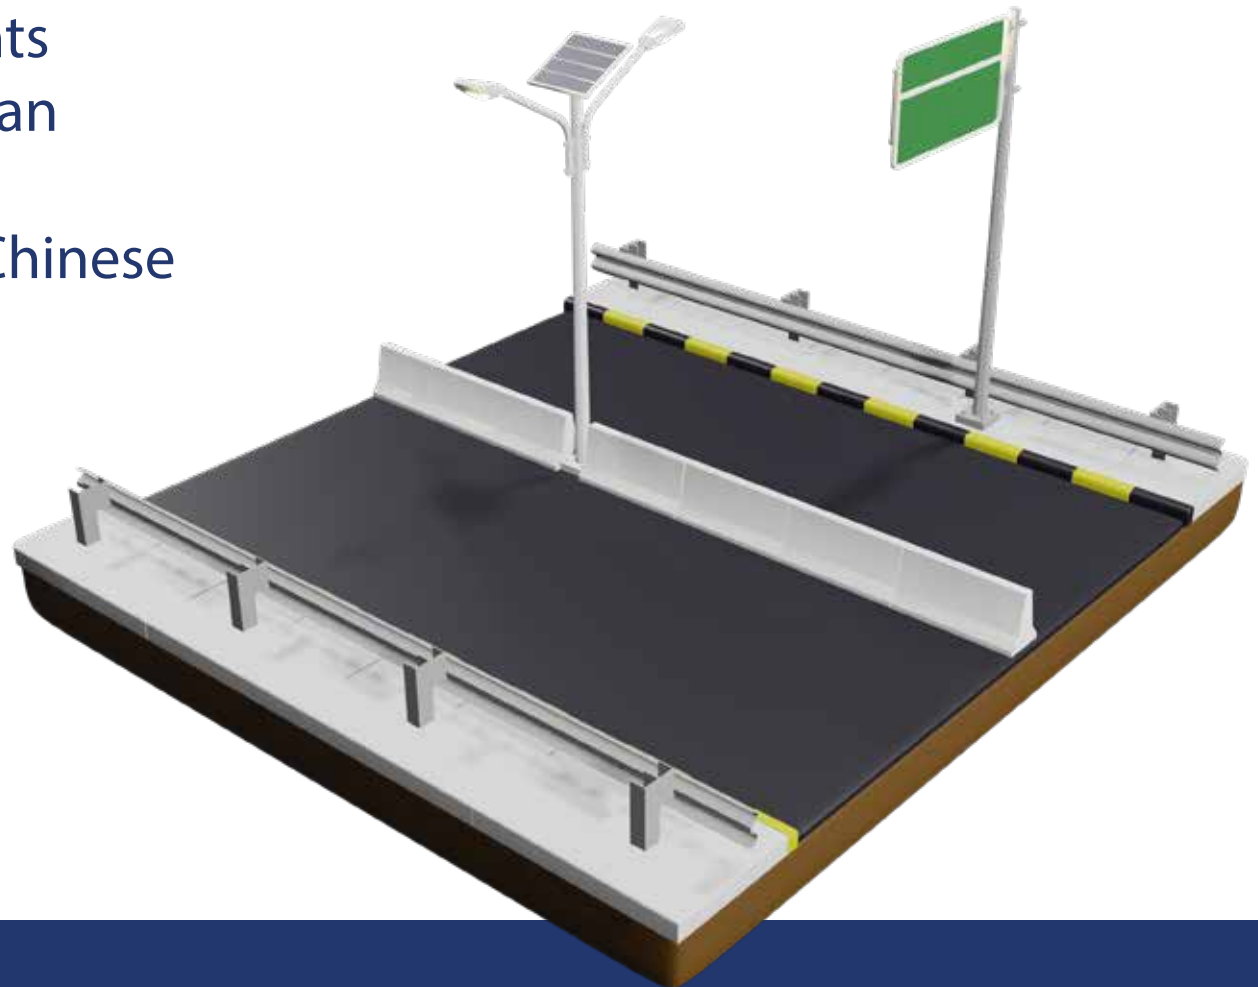

Marota City

Marota City represents a new dawn for Damascus, blending its deep-rooted history with modernity and global sophistication. AL Diwan United Company had a significant role in this urban transformation by acquiring construction permits for two luxury towers, beginning full-scale development from structural works to operational readiness.

Solar-Powered Road and Traffic Lighting Projects

- Solar-powered traffic lights were installed by United Diwan on Al-Mazza Highway.
- In cooperation with the Chinese Embassy, the company implemented solar street lighting in the town of Serghaya.
